

AP-800C Asphalt Paver

Engine

The Caterpillar® 3054DIT engine is a reliable and durable diesel engine for years of low maintenance operation.

Hydrostatic Drive System

The efficient hydraulic drive system eliminates chains and other mechanical linkages between diesel engine and final drive components.

Operator's Station

The single operator's station is designed for comfort and optimum efficiency.

Control Console

The control console full instrumental package keeps the operator informed of all major systems.

Material Handling System

The material handling system offers precise mix delivery through the most advanced material handling system.

Outboard Feeder Drives

The outboard feeder drives' increased live tunnel area provides easy servicing.

Adjustable Height Auger Assembly

The adjustable height auger assembly promotes mat consistency and minimizes segregation.

Serviceability

Simplified service means more paving and less maintenance time.

Extend-A-Mat B Screed

Extend-A-Mat B Screed has variable width, power extending screed that increases productivity and lowers operating costs.

Pavemaster B Screed

Models 8B and 10B. The heavy-duty conventional fixed-width screed provides simple economical operation.

Customer Support

Cat® dealer services help you operate longer with lower costs.
